Technical Achievements

- Leading the frontend development of a successful AI driven banking web app (most recently)
- Contribute to the development and launch of internal web tools in various latin American countries.
- Connect different government banking API technologies with the upmost security and design patterns.
- Destructure a monolithic repository and designing a microfrontend core to allow international tech teams to maintain and manage projects with more ease
- Being accountable for an IT team of five, and leading the team's workflow throughout the sprints.

Relevant Experience

Front-end Engineer @ Kapital

May 2023 - July 2024 // Mexico City, Mexico

- Design and document software solutions matching the current business needs
- Writing functionally complex and visually appealing web components
- Integrating backend services on the frontend, handling SSR and Redux store
- Collaborate with multi-disciplinary teams, enrolling in activities with UX Design, Artificial Intelligence, software infrastructure and stakeholders.

Stack: NextJS, Typescript, Redux, React, Tailwind, Git, Bitbucket, REST

Front-end Engineer @ KingTide

April 2021 - Jan 2023 // Mexico City, Mexico

- Writing code for assigned tasks, including writing the tests for it
- Testing and implementing REST and GraphQL endpoints on the frontend
- Participate on the Agile sprint planning, ticket creation, follow up and completion
- Conduct and participate on daily client meetings and translate business needs to software solutions.

Stack: React, NextJS, Styled Components, GraphQL, REST, HTML, CSS, Git, Jira, Github.

Front-end Engineer @ Rappi

June 2019 - Oct 2020 // Mexico City, Mexico

- Participate on the daily team briefings and meetings
- Write code for assigned tasks
- Implement REST endpoints to the frontend
- Implement GraphQL endpoints to the frontend
- Refactor legacy code to improve code quality and make adjustments
- Participate on code reviews
- Comply with code testing coverage, prevent code smells and bugs
- Communicate and collaborate with multi-disciplinary teams of engineers designers, producers, clients, and stakeholders on a daily basis

Stack: Angular 10+, React, Typescript, GraphQL, REST, HTML, CSS, Single SPA, Material Components, Git, Bitbucket, Jira, Confluence.

Skills

Programming languages

JavaScript (ES6), TypeScript, HTML, CSS/Sass, GraphQL

Libraries & Frameworks

React, Angular, Next.js, Tailwind, Styled components, Node.js, Redux, Storybook

Tools & Platforms

Git, Github, Heroku, Docker, Jira, Bitbucket, Scrum

Design

Zeplin, Figma

Education

Ironhack

May 2019 // Mexico City, Mexico
Full-stack web development bootcamp

UNAM Canada

Jan 2018 // Ottawa, Canada
C1 English certificate

Projects

Github Profile

Github API search and display users profiles and repositories in a nice way

Site

My personal landing website, displaying my work experience, using Next.js, Internationalization and responsive color theming

Interests

Music making, rollerblading, traveling, reading
